Appendix 11-P2-3: Part 2 (CWAH 7-9) Gazetteers of Heritage Assets

1 Introduction

- 1.1. The gazetteer tables¹ presented in this appendix identify the following heritage assets relevant to the canal work area heritage (CWAH) 7-9 study areas in Part 2 of the Proposed Development:
 - a. Designated heritage assets within the indicative work areas and surrounding 500 m study areas (**Table 1**); and
 - b. Non-designated heritage assets within the indicative work areas and surrounding 500 m study areas (**Table 2**).
- 1.2 Some heritage assets are located in more than one study area where these extend into other Parts of the Proposed Development. Where this occurs, this is stated in the location column of the relevant gazetteers.
- 1.3 The locations of designated and non-designated heritage assets that correspond to each of the gazetteers are shown on the accompanying figures in Preliminary Environmental Information (PEI) Report **Volume 3**:
 - a. **Figure 11-P2-1: Part 2: Designated Heritage Assets**; and
 - b. **Figure 11-P2-2: Part 2: Non-Designated Heritage Assets**.

¹ All data presented in the gazetteers is taken from either the National Heritage List for England (NHLE) dataset (designated assets) or the relevant Historic Environment Record (HER) (non-designated assets). The data is a primary source, and is presented as it appears on the relevant dataset

CWAH 7 Long Buckby Wharf to Weedon Bec					
1003879	Scheduled Monument	Site of Bannaventa	This record has been generated from an "old county number" (OCN) scheduling record. These are monuments that were not reviewed under the Monuments Protection Programme and are some of our oldest designation records. As such they do not yet have the full descriptions of their modernised counterparts available. Please contact us if you would like further information.	SP 61296 64559, SP 61092 64514	Within the Part 2 CWAH 7 Study Area
1009555	Scheduled Monument	Muscott deserted medieval village and double moated site	The village, comprising a small group of houses, gardens, yards, streets, paddocks, often with a green, a manor and a church, and with a community devoted primarily to agriculture, was a significant component of the rural landscape in most areas of medieval England, much as it is today. Villages provided some services to the local community and acted as the main focal point of ecclesiastical, and often of manorial, administration within each parish. Although the sites of many of these villages have been occupied continuously down to the present day, many others declined in size or were abandoned throughout	SP 62686 63349	Within the Part 2 CWAH 7 Study Area

National Heritage List for England (NHLE) Reference	Designation and Grade	Name	Description	National Grid Reference (NGR)	Location
			the medieval and post-medieval periods, particularly during the 14th and 15th centuries. As a result over 2000 deserted medieval villages are recorded nationally. The reasons for desertion were varied but often reflected declining economic viability, changes in land use such as enclosure or emparkment, or population fluctuations as a result of widespread epidemics such as the Black Death. As a consequence of their abandonment these villages are frequently undisturbed by later occupation and contain well-preserved archaeological deposits. Because they are a common and long-lived monument type in most parts of England, they provide important information on the diversity of medieval settlement patterns and farming economy between the regions and through time.

MNN4714	The River Nene	Water	In the earlier days, the traffic on the river was coal, timber, some stone and grain. During 1844, receipts were a record £2,435, almost	Palaeolithic	SP 89910 73910	Within the Part 2 CWAH 7

Historic Environment Record (HER) Reference	Name	Record Type	Description	Period	NGR	Location
			entirely from transport of materials for building the Northampton and Peterborough Railway, which was opened in 1845, and trade on the river immediately slumped: in 1852 the tolls were a meagre £104. In recent years, the commercial traffic was almost entirely grain for Whitworth's Mills at Wellingborough, which came via Brentford to Blisworth Junction and then along the Northampton arm to join the river at the south end of town. This traffic ceased in March / April 1969, after the opening of the new grain terminal at Tilsbury with great economies in handling costs by using rail transport.			Indicative Work Area

MNN29224	Stowe Ironworks	Non-extant Building	Ironworking in Heyford parish between 1866 & 1891; site was later used as brickworks;	Post-medieval	SP 65197 57841	Within the Part 2 CWAH 8 Study Area
MNN13530 1	Stowe Works	Non-extant Building	A brickworks set up by the Nine Churches Iron Ore Co, which was formed in 1875. The site was used as an ammunition dump during WWII	Modern	SP 65260 57744	Within the Part 2 CWAH 8 Study Area
MNN13594 2	Canal Wharf	Canal	None provided	Post-medieval to Modern	SP 65300 58300	Within the Part 2 CWAH 8 Study Area

Historic Environment Record (HER) Reference	Name	Record Type	Description	Period	NGR	Location
MNN135855	Open Field System, Nether Heyford	Ridge and Furrow	The date of the enclosure of the common fields of Nether Heyford is unknown, but was certainly before 1794. Ridge and furrow of these fields exists on the ground or can be traced on air photos over most of the parish, except on the low lying floodable land close to the River Nene. It is arranged mainly in rectangular furlongs lying end-on or at right angles to each other except on the steep land in the south west of the parish where it lies across the contours in a radiating pattern. On the top of the Heyford Hills no ridge and furrow is visible, probably because all trace of it has been removed by modern cultivation of the light Northampton sand there. Much of the recoverable ridge and furrow is characterised by well-marked reversed-S curves.	Medieval	SP 65500 58500	Within the Part 2 CWAH 8 Study Area
MNN170518	Modern brickworks	Non-extant Building	A brickworks in operation by 1834	Modern	SP 65500 57700	Within the Part 2 CWAH 8 Study Area

Historic Environment Record (HER) Reference	Name	Record Type	Description	Period	NGR	Location
MNN133060	Open Fields Project: Areas of Survival of Ridge & Furrow	Ridge and Furrow	Earthwork (Aerial Photography); aerial photography suggests this field is now arable and that the earthworks have now been destroyed	Medieval to Post-medieval	SP 66359 56957	Within the Part 2 CWAH 8 Study Area

MNN115149	C20th Clay Receiving Shed	Building	The building is almost certainly the clay receiving shed referred to by O'Rourke. Its primary function was to receive clay from the nearby clay pits. This was transported in hand pushed narrow gauge rail mounted wooden tubs. The tubs were hauled by cable to the first storey from where the clay would be tipped from the tubs into the pug-mill below. This machine kneaded the clay into a workable state in order that it could be fed into the extrusion die. The bricks would be (wire?) cut and removed by barrow for drying in a nearby drying shed.	Modern	SP 7448349376	Within the Part 2 CWAH 9 Study Area

MNN137143	Rookery Farm	Non-extant Building	Northamptonshire (63 examples recorded to date, gazetteer in NMR, Swindon). Northamptonshire was a county dominated by large estates. Nearly a third of the area was in estates of over 10,000 acres and there were 38 owners of more than 3,000 acres in 1871. However, according to Caird, 'many of them have no interest in their farms beyond the annual rent they receive, know nothing of the management of land	Modern	SP 74500 50000	Within the Part 2 CWAH 9 Study Area

Historic Environment Record (HER) Reference	Name	Record Type	Description	Period	NGR	Location
			themselves and do not employ an agent who does.' As a result 'their tenants, from deficient buildings and want of drainage are incapacitated from doing justice to their farms'. There were of course exceptions to this general picture. The Spencers of Althorpe were well known for their interest in improvements, the third Earl Spencer being the first President of the Royal Agricultural Society of England. The Duke of Grafton was also influential, and in the 1830s erected well-planned sets of buildings on several of his farms
